

Flying Safety just got Better!
The popular CASTLEBERRY line of Horizons
Are now available with
ARINC 429 !

Industry's highly respected attitude horizons now provide operators with sophisticated and highly capable benefits not found elsewhere in a panel-mounted gyro.

Castleberry's new line of gyro horizon instruments now provide digital output signals for other modern avionics components, including:

- Radar Stabilization
- Autopilots
- Flight Data Recorders
- TCAS
- Back Up for ADHRs
- GPWS

Additionally, the company's popular line of back-up horizons are also now supplied with ARINC 429 capability.

These units are supplied with various customer specified options for power, lighting and panel mounting.
